

# Does your current treatment option for nasal polyps only **scratch the surface**?

SINUVA is the **first and only FDA-approved stent** for the **treatment of nasal polyps** in adult patients who have already had a sinus surgery. SINUVA expands in the ethmoid sinus and delivers anti-inflammatory medication that reduces sinus polyp inflammation directly where it's needed.

## SINUVA is **NOT** another:

- ✗ Saline rinse
- ✗ Steroid spray
- ✗ Oral steroid
- ✗ Surgery

## Why SINUVA?

### Avoid another surgery

In-office, non-surgical alternative for nasal polyps.

### 24/7 medication for 90 days

Does not have to be taken daily.

### Breathe easier

Continuous symptom relief for up to 90 days.

## SINUVA works for you

**Proven to shrink nasal polyps** and **reduce symptoms** of nasal obstruction and congestion for up to 90 days.

**Reduced ethmoid sinus obstruction** and **improved impaired sense of smell** compared to patients treated with daily steroid nasal spray\* alone.

**Resulted in fewer patients still needing repeat sinus surgery** compared to patients that were treated with daily steroid nasal spray\* alone.

\*Mometasone furoate nasal spray.

## IMPORTANT SAFETY INFORMATION

Serious allergic reactions have happened in patients using mometasone furoate (the main ingredient in SINUVA) including rash, itching or swelling of the lips, face, tongue, and throat, and breathing problems. Call your doctor right away if you have any of these reactions.

**Please see additional Important Safety Information on reverse side.**
